## SECURITY MANAGER

---

*L-3 Communications Electron Technologies, Inc., located in Torrance, is a leading provider of high-reliability products to space and defense customers. For more than 50 years we have been recognized as the industry's foremost manufacturer of high-power radio frequency amplifiers for satellite communications and radar applications, including signal-amplifying traveling wave tubes and high-voltage power supplies. We now offer a full range of satellite payload products that includes state-of-the-art electric thrusters for interplanetary spacecraft propulsion and satellite stationkeeping. We currently have an opportunity for an experienced SECURITY MANAGER at our Torrance, California facility. In this position you will develop, implement, and administer a variety of policies, procedures and plans that address industrial security issues, ensuring compliance with government and company requirements while providing a secure and safe workplace. You'll be responsible for government program security, proprietary information protection, information system security management, and communications security. In addition, you will oversee contract security guard services, maintain effective site access controls, coordinate emergency planning and response, and conduct investigations as necessary.

You should have 10 years of progressively responsible industrial security experience, with in-depth knowledge of applicable DoD and NISPOM regulations as well as JPAS processes and procedures. FSO certification and working knowledge of Sensitive Compartmented Information (SCI) and Special Access Programs (SAP) security requirements and processes is preferred. Well-developed written and verbal communication skills are necessary to effectively interface with appropriate government agencies, customers, suppliers, company management and employees. An active DoD Secret security clearance and active SSBI clearance are required, and a bachelor's degree in a relevant discipline or equivalent additional experience is necessary.
